

RONDALE RAE B. BUFETE

Software Engineer

+63 995 079 4708 | rondale.bufete7@gmail.com | Ocampo, Camarines Sur

SUMMARY

Versatile Software/Web Developer with hands-on experience building custom web applications, automating workflows, and optimizing data management systems. Proficient in PHP, JavaScript, and modern frameworks, with a strong aptitude for integrating AI tools and automation to streamline development processes and enhance site performance.

TECHNICAL SKILLS

- **Frameworks & Libraries:** React, React Native (Expo), CodeIgniter 4, Laravel, Next.js
- **Web & Styling:** HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind
- **Backend & APIs:** PHP, Python, Node.js, Express, RESTful API, Google Auth (OAuth 2.0), Postman (API Testing)
- **Database Management:** MySQL (RDBMS), NoSQL (MongoDB)
- **Version Control & CI/CD:** Git, GitHub, CI/CD Pipelines, GitHub Actions, VPS Deployment, SourceTree
- **AI Tools:** GitHub Copilot, ChatGPT, Claude (for code assistance, debugging, and workflow automation)
- **Soft Skills:** Technical Decision-Making, Self-Directed Learning, Client Communication & Requirement Gathering, High-Pressure Problem Solving, Cross-Functional Team Collaboration

PROJECTS

Billing Alerts and Management System for GregLink Internet Solutions

Freelance Project | March 2026

- Migrated GregLink's legacy Excel-based client data workflows into a secure, centralized full-stack web application (Laravel, MySQL), eliminating manual spreadsheet errors and giving the team a single source of truth for client records.
- Designed and deployed an automated email alert system for client billing notifications, replacing manual tracking and shortening the gap between invoice due dates and client payment.
- Engineered the end-to-end application architecture and deployed it to a VPS with optimized query performance, enabling the system to reliably support 300+ client accounts without slowdowns.
- Enabled the client to identify non-paying and delinquent accounts through real-time billing visibility, resulting to a 60% increase in collected income.
- Partnered directly with the client to gather requirements and iterate on features throughout development, ensuring the final system matched real day-to-day operations rather than requiring rework after launch.

Augmented Reality Mobile Application for Digital Preservation and 3D Visualization for CSPC Center for Rinconada Culture and the Arts

Lead Developer / Software Engineer (Capstone Project)

Web-Based CMS with AR Mobile Application and 3D Automation

- Built an Android Augmented Reality application using React Native, Expo, and ViroReact, integrated with the CMS through REST APIs, giving users immersive, real-time visualization of 3D cultural artifacts directly on mobile devices.
- Engineered a Node.js and Puppeteer automation engine for the 3D photogrammetry workflow on the Kiri Engine platform, with built-in error handling and retry mechanisms, removing the need for manual scan intervention and making the digitization pipeline self-sufficient.
- Designed, developed, and documented secure RESTful APIs connecting the CMS, automation engine, and mobile application, enabling real-time synchronization of 3D assets and metadata across the entire system.
- Architected a full-stack Content Management System (CodeIgniter 4, MySQL) using MVC architecture and deployed it to a VPS with a real-time Server Analytics Dashboard, centralizing digital cultural asset management and giving the team ongoing visibility into system performance and server health.

EXPERIENCE

Technical Support Engineer (Intern)

Concentrix Naga | February - May 2026

- Completed 486 hours of intensive technical support training, resolving hardware, software, and network configuration issues under real client conditions, building hands-on troubleshooting speed and accuracy across a wide range of technical problems.
- Diagnosed system bottlenecks using analytical and structured problem-solving methods, minimizing downtime and keeping systems running smoothly for end users.
- Collaborated within a fast-paced team using enterprise communication tools, documenting technical issues and solutions clearly, ensuring consistent handoffs and faster resolution for recurring problems.

EDUCATION

Camarines Sur Polytechnic Colleges - Bachelor of Science in Information Technology

2022 - 2026

STI College Naga - IT in Mobile Application and Web Development

CERTIFICATIONS

- EF SET English C1 Advanced - EF SET (January 2025)
- System Administration - Linux Professional Institute (June 2022)
- Responsive Web Design - FreeCodeCamp (August 2022)
- Data Structures & Algorithms - FreeCodeCamp (September 2022)

SEMINARS & INDUSTRY ENGAGEMENT

- 13th Bicol Youth Congress in Information Technology (BYCIT) - CSPC Gymnasium | April 2025
- CSPC-DOST Asog TBI Awareness Program - CSPC Nabua | March 20, 2025
- Research Colloquium, College of Computer Studies - CSPC Auditorium | March 2-3, 2025
- Full Stack Open - University of Helsinki | Online Course
