

RONDALE RAE B. BUFETE

Full Stack Developer

+63 995 079 4708 | rondale.bufete7@gmail.com | Camarines Sur, Philippines | linkedin.com/in/ronbufete7/

SUMMARY

Full stack developer with hands-on experience delivering web and mobile applications across the full project lifecycle, from database design and back-end architecture to responsive front-end interfaces. Skilled in React, Next.js, Node.js, PHP / Laravel, and REST API development, with working knowledge of relational and NoSQL databases and Linux/Unix-based deployment environments. Comfortable collaborating with business analysts, designers, and project managers to translate requirements into reliable, well-documented technical solutions.

TECHNICAL SKILLS

- **Frameworks & Libraries:** React, React Native (Expo), Laravel, Next.js, Typescript.
- **Web & Styling:** HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind.
- **Backend & APIs:** PHP, Python, Node.js, Express, RESTful API, Google Auth (OAuth 2.0), Postman
- **Database Management:** MySQL, Postgres, NoSQL (MongoDB).
- **Version Control & CI/CD:** Git, GitHub, CI/CD Pipelines, GitHub Actions, VPS Deployment, SourceTree.
- **AI Integration & Automation:** Utilizing LLMs (ChatGPT, Claude) for development acceleration, workflow automation, and developing application integrations.

EXPERIENCE

Freelance Full Stack Developer

Self-Employed | January 2024 - March 2026

- Designed and delivered end-to-end full-stack web applications using React, Next.js, Laravel, Supabase, Postgres, and MySQL, tailored to client requirements.
- Owned the full project lifecycle from architecture to deployment, delivering scalable, maintainable solutions with minimal post-launch support.
- Collaborated directly with clients to gather requirements and translate technical concepts into practical solutions aligned with business workflows.
- Implemented comprehensive testing and debugging processes, reducing post-deployment bugs by **80%** and ensuring zero-downtime handoffs.
- Architected custom full-stack solutions with modern technologies, optimizing application performance, scalability, and long-term maintainability.

Technical Support Engineer (Intern)

Concentrix Naga | February 2026 - May 2026

- Resolved hardware, software, and network issues under SLA conditions while automating repetitive troubleshooting tasks, increasing ticket resolution speed.
- Diagnosed system bottlenecks using structured troubleshooting methods, minimizing downtime and maintaining reliable system performance.
- Prioritized and managed support tickets against SLA deadlines, ensuring consistent response times during high-volume periods.
- Documented technical solutions and SOPs in a centralized knowledge base, reducing resolution time for recurring support issues.

SOFT SKILLS

- Technical Decision-Making, Analytical & Critical Thinking, High-Pressure Problem Solving, Self-Directed Learning, Adaptability, Client Communication & Requirement Gathering, Cross-Functional Team Collaboration, Project Ownership, Technical Documentation, Time Management & Prioritization, Continuous Improvement Mindset.

PROJECTS

Billing Alerts and Management System for GregLink Internet Solutions

Freelance Project | February 2026 - March 2026

- Migrated legacy Excel workflows into a secure Laravel and MySQL web application, eliminating manual errors and centralizing client records.
- Designed and deployed automated billing email notifications, replacing manual reminders and accelerating client payments.
- Engineered and deployed the application on a VPS with optimized database performance, supporting 300+ client accounts reliably.
- Developed real-time billing monitoring features, enabling identification of delinquent accounts and increasing collected income by **60%**.
- Collaborated with stakeholders to translate business requirements into functional solutions, delivering a deployment with zero post-launch rework.

Augmented Reality Mobile Application for Digital Preservation and 3D Visualization for CSPC Center for Rinconada Culture and the Arts

Lead Developer / Software Engineer (Capstone Project)

Web-Based CMS with AR Mobile Application and 3D Automation

- Developed an Android AR application using React Native, Expo, and ViroReact, enabling immersive real-time visualization of 3D cultural artifacts.
- Engineered a Node.js and Puppeteer automation engine for photogrammetry, eliminating manual scan intervention through automated retries and error handling.
- Designed and documented secure REST APIs, enabling real-time synchronization between the CMS, automation engine, and mobile application.
- Architected and deployed a CodeIgniter 4 CMS with a real-time analytics dashboard, centralizing asset management and improving server monitoring.

EDUCATION

Camarines Sur Polytechnic Colleges - Bachelor of Science in Information Technology 2022 - 2026

STI College Naga - IT in Mobile Application and Web Development 2020 - 2022

CERTIFICATIONS

- Data Analyst: Professional Certificate in Data Analysis-MTF Institute of Management, Technology and Finance (Udemy)
- Responsive Web Design - FreeCodeCamp (July 2026)
- EF SET English C1 Advanced - EF SET (January 2025)
- System Administration - Linux Professional Institute (June 2026)

PROFESSIONAL DEVELOPMENT

- Full Stack Open - University of Helsinki (Online Course)
- 13th Bicol Youth Congress in Information Technology (BYCIT) - CSPC Gymnasium | April 2025
- CSPC-DOST Asog TBI Awareness Program - CSPC Nabua | March 20, 2025
- Research Colloquium, College of Computer Studies - CSPC Auditorium | March 2-3, 2025
